HIHO FINE BUBBLE+e
Microcurrent Nanobubble Shower Head

Elevate Your Shower, Energize Your Skin

Microcurrent

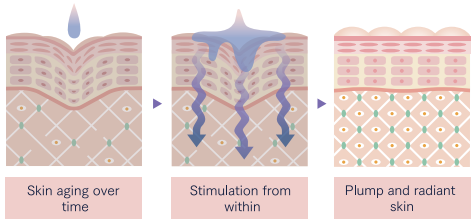

Unlock the Secret to Better Skin and Hair

Skin Rejuvenation Firmness & Radiance Anti-Aging Care

The First and Only Microcurrent Shower Head in the World

What is Microcurrent?

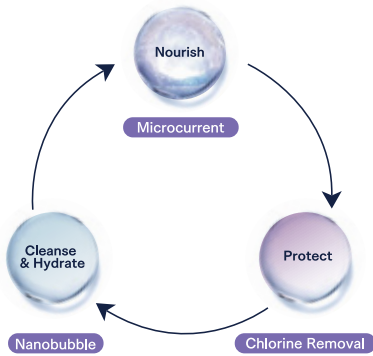

Originally utilized by beauty salons or medical devices, microcurrent is a weak current that stimulates the skin from within, boosting collagen production and preventing the skin from pre-maturing.

Science-Backed Skin-Nourishing Shower Head

Enhance your skin's innate self-healing ability through these 3 aspects:

- 01 Stimulate dormant skin cells with microcurrent
- 02 Strengthen skin barrier with chlorine removal
- 03 Deep cleanse and hydrate skin with nanobubble

Skin-Nourishing

Three Adjustable Shower Modes

Right | ●

HIHO Microcurrent mode

A gentle current of 500 µA stimulates muscles and improves blood circulation, energizing your skin to look more toned.

Middle | ○

HIHO Mist mode

Ultra-fine mist helps your skin lock in moisture, resulting in softer, more hydrated skin.

Left | ○

HIHO Straight mode

Effectively removes contaminants from your pores, making it perfect for use at the beginning of your shower.

How to Use

Simple Installation,
No Handyman Needed

Filter Cartridge

For HIHO FINE BUBBLE+® Shower Head

(1 filter cartridge included in the package)

Unscrew the shower head by turning it counterclockwise, and install the filter cartridge as shown.

Note: Please do not remove the red rubber packing ring.
